Portfolio Update

In February, the S&P/TSX Composite index saw a positive return of 1.8%, in contrast to a slight decline of 0.4% in Canadian Bonds as indicated by the Bloomberg Canada Aggregate Bond Index.

The MAG 7, led by NVDA, has been a focal point for investors. NVDA's remarkable surge of 60% in just two months has contributed to over 25% of the total return of the S&P500 Index year-to-date. However, the MAG 7 landscape is not uniform, as AAPL, TSLA, and GOOGL have experienced declines this year. Despite this disparity, the market seems to be adapting to the changes, highlighting its resilience as capital shifts towards new segments. Sector performance continuing to favor cyclicals over defensives, such as Discretionary over Staples or Financials over Utilities, reinforces the notion of further positive momentum in stocks. Furthermore, credit and volatility markets remain stable, indicating minimal stress at present. In essence, the market is broadening its sources of strength, a welcomed development for most participants.

The Mulvihill Premium Yield Fund (MPY) returned 3.9% in February with a currently yield standing at 6.9%. Year-to-date, MPY has achieved a return of 5.2%, outperforming both the S&P/TSX Dividend Aristocrats Index, which saw a return of 1.7%, and the Bloomberg Canada Aggregate Bond Index, which experienced a decline of -1.9%. MPY paid its third consecutive monthly distribution at an increased rate of \$0.5417. Notably, all distributions since inception have been tax-efficient return-of-capital. Wells Fargo & Co emerged as the top-performing stock in the portfolio for the month, surging by 13.3%. Conversely, Canadian Natural Resources witnessed a decline of -5.6%, making it the worst performer in the portfolio.

Earn tax-efficient Return of Capital "ROC" distributions

*Distribution Yield based on most recently declared distribution annualized, as a percentage of the ETF Class net asset value as of February 29, 2024

Actual yield changes daily based on market conditions

**ROC distribution require an ACB adjustment and unitholders pay capital gains tax when units sold

Using highest marginal tax rates in Ontario

Options Update

Throughout the month, the VIX fluctuated within a tight range of 12.8 to 15.9, indicating sustained low volatility across the broader market. Despite this, we've consistently identified viable avenues to generate option premium. Our strategy remains centered on writing out-of-the-money put options, which not only yields attractive premiums but also offers a favorable equilibrium between income generation and safeguarding against downturns. On average, MPY allocated 16% of the portfolio to options trading during the month, with 12% dedicated to written put options and 4% to written call options. The total option premiums generated during this period amounted to 0.66%.

Why invest in MPY?

MPY offers a compelling solution for investors seeking a balance between income and growth. Its combination of high tax-efficient distributions, lower risk, and capital appreciation potential makes it a unique offering in the income-generating space. With its experienced management and strong track record, MPY can be a valuable addition to any investment portfolio seeking consistent returns and reduced volatility.

Actively managed portfolio:

- Invests in large-cap North American equities and uses option writing strategies

Enhanced tax-efficient distributions:

- 6.9% current yield
- Aims to generate income through dividends and option premiums
- ROC Distributions, paid monthly

Potential for capital appreciation:

- While income-focused, the fund also seeks to deliver capital gains over time

Reduced Volatility:

- The fund aims to provide lower downside risk compared to traditional buy-and-hold strategies through its active management and option strategies

Experienced Management:

- 27+ year track-record managing option-based strategies
- Proven track record of success in income-generating strategies
- Investment team has combined 258 years Investment experience

MPY Tax-Efficient Yield Methodology

Generate income through writing options

- Write covered call & cash covered put options
- Option premiums treated as capital gains (not income) from tax perspective

Capital-loss carry forward

- MPY has capital loss carry forwards, in excess of \$90 Million*
- Losses shelter capital gains generated (including option premiums)

ROC distributions

- ROC distributions paid to unitholders
- Distributions paid monthly
- 7.2% current yield

*as of December 31,2022
