Semi-Annual Report 2020

Letter to Shareholders

We are pleased to present the 2020 semi-annual report containing the management report of fund performance and the unaudited financial statements for World Financial Split Corp. (The "Fund").

Stock markets around the world exhibited significant volatility in the first half of 2020 as economies and businesses were gripped by the COVID-19 (Coronavirus) pandemic. After reaching all-time highs in the third week of February, both the S&P/TSX Composite Index and the S&P 500 Index declined 37.4 percent and 33.8 percent respectively to the low reached on March 23rd as new cases and fatalities rose exponentially. However, since then, equity markets have staged a historic comeback, even as new cases and fatalities continued to increase, with both markets rising over 39 percent from the low. Central banks and governments around the world have responded with unprecedented monetary and fiscal policies to prop up economies and keep funding markets open. The total return of the S&P/TSX Composite Index for the semi-annual period ending June 30, 2020 was negative 7.5 percent and negative 3.1 percent for the S&P 500 Index.

During the six months ended June 30, 2020, the Fund paid cash distributions of \$0.26 per Preferred share though no distributions were paid on the Class A shares in accordance with the terms of the prospectus as the net asset value per Unit was less than \$15.00. The Fund's total return per Unit, including reinvestment of distributions, was negative 20.9 percent for the period. The net asset value decreased from \$13.50 per Unit at December 31, 2019 to \$10.41 per Unit at June 30, 2020. The net realized gain on options attributable to Strathbridge Selective Overwriting strategy (see "The Fund") amounted to \$0.60 per Unit during the period compared to a net realized gain on options of \$0.19 per Unit a year ago. For a more detailed review of the operations of the Fund, please see the Results of Operations and the Portfolio Manager Report sections.

We thank all shareholders for their continued support and encourage shareholders to review the detailed information contained within the semi-annual report.

The Fund

The Fund is a split share corporation designed to provide Preferred shareholders with fixed cumulative preferential quarterly distributions and the Class A shareholders with attractive quarterly distributions and the return of the original issue price on the termination date of the Fund. The shares are listed on the Toronto Stock Exchange under the ticker symbols WFS.PR.A for the Preferred shares and WFS for the Class A shares. A Unit of the Fund consists of one Preferred share and one Class A share.

To accomplish its objectives, the Fund invests in a portfolio which includes common equity securities selected from the ten largest financial services or real estate companies by market capitalization in each of Canada, the United States and the Rest of the World (the "Portfolio Universe"). The issuers of securities in the Portfolio Universe, other than Canadian issuers, must have a minimum credit rating of "A" from Standard & Poor's Rating Services or a comparable rating from an equivalent rating agency. In addition, up to 25 percent of the net asset value of the Fund may be invested in common equity securities of financial services or real estate companies not included in the Portfolio Universe as long as such companies have a market capitalization at the time of investment of at least US\$10 billion and for non-Canadian issuers, a minimum credit rating of "A—" from Standard & Poor's Rating Services or a comparable rating from an equivalent rating agency. The Fund may also invest in public investment funds including exchange-traded funds or other Strathbridge Funds (provided that no more than 15 percent of the net asset value of the Fund may be invested in securities of other Strathbridge Funds) that provide exposure to such securities.

The Fund employs a proprietary investment strategy, Strathbridge Selective Overwriting ("SSO"), to enhance the income generated by the portfolio and to reduce volatility. In addition, the Fund may write cash covered put options in respect of securities in which it is permitted to invest.

The SSO strategy is a quantitative, technical based methodology that identifies appropriate times to write and/or close out option positions compared to writing continuously and rolling options every thirty days. This proprietary process has been developed over many years through various market cycles. The Manager believes the primary benefit to investors is to maximize the total return of the particular portfolio while reducing the level of volatility of the portfolio, thereby increasing the risk-adjusted return.

Portfolio Manager Report

Stock markets around the world exhibited significant volatility in the first half of 2020 as economies and businesses were gripped by the COVID-19 (Coronavirus) pandemic. After reaching all-time highs in the third week of February, both the S&P/TSX Composite Index and the S&P 500 Index declined 37.4 percent and 33.8 percent respectively to the low reached on March 23rd as new cases and fatalities rose exponentially. However, since then, equity markets have staged a historic comeback, even as new cases and fatalities continued to increase, with both markets rising over 39 percent from the low. Central banks and governments around the world have responded with unprecedented monetary and fiscal policies to prop up economies and keep funding markets open. The total return of the S&P/TSX Composite Index for the semi-annual period ending June 30, 2020 was negative 7.5 percent and negative 3.1 percent for the S&P 500 Index.

The Global Financials companies underperformed the broader market during the period with a total return of negative 24.2 percent compared to a total return of negative 1.0 percent for the S&P Global 100 Index. Concerns surrounding deteriorating credit and higher loan loss provisions for both individuals and corporations due to the economic impact that COVID-19 has delivered globally has weighed on the Global Financials share price performance, along with potentially lower wealth management earnings and net interest margins. The suspension of share repurchases and dividends in some countries has also created a headwind for the group.

For the six months ended June 30, 2020, the net asset value ("NAV") of the Fund was \$10.41 per Unit compared to \$13.50 per Unit at December 31, 2019. Preferred shareholders received cash distributions of \$0.26 per share during the period, while the distribution for the Class A share remains suspended in accordance with the terms of the prospectus as the net asset value per Unit was less than \$15.00. The Fund's Preferred shares, listed on the Toronto Stock Exchange as WFS.PR.A, closed on June 30, 2020 with a mid-price of \$8.57 per share, while the Class A shares, listed as WFS, closed at a mid-price of \$1.80 per share. When combined, the closing prices represent a \$0.04 discount to the NAV per Unit.

The total return of the Fund, including reinvestment of distributions, for the six months ended June 30, 2020 was negative 20.9 percent per Unit. The best performing stock within the portfolio was Blackrock Inc., up 15.2 percent during the period. At the other end of the spectrum, Bank of America Corporation, was the worst performing stock in the portfolio, down 35.9 percent while held in the Fund.

Volatility levels for Global Financial Services companies increased significantly in March as markets sold off but declined for the rest of the period as markets have recovered significantly from the lows. However, volatility remains elevated relative to levels experienced over the past few years. As a result, the covered call writing activity was higher in the first quarter with an average of 24.1 percent of the portfolio written which then declined to 20.6 percent in the second quarter. The Fund ended June 30, 2020 with 29.3 percent of the portfolio subject to covered calls and a cash position of 10.6 percent. The U.S. dollar exposure was actively hedged back into Canadian dollars throughout the period and ended June with approximately 50 percent of the U.S. dollar exposure hedged.
